WELCOME!

Your opinion is very valuable to us in our work to develop the course you have just participated in. We appreciate your comments about things we should change as well as those we should keep as they are, and feel free to give hands-on suggestions on how to improve the course!

All answers are anonymous. This is important, so do not write your name anywhere in the evaluation since this may enable the tracking of other participants identities.

Thank you for your effort and cooperation!

Comments:

- Det känns som att allt det här tjetet om kommunikation och källkritik inte riktigt passar på en kurs vars mål är att lära att bygga algoritmer. Att få in mer "skriftlig utveckling" skulle bara kännas krystat och är mest fina ord som ligger i tiden. ¹

FREE COMMENTS**What in this course was particularly good?**

- Mycket uppgifter att lösa själv men med stöd av föreläsarna. Man slapp köpa dyra böcker som blir omoderna på två år. ¹
- handins. you learn a lot by doing them ³
- I thought the course was particularly good overall. It was well-organized, presented well, and I learned a lot of valuable information. ⁷
- Att starta med exercises direkt och ha dem löpande över hela kursen. Bra upplägg! ⁸
- that torgeir is very helpful ¹²

What in this course can be improved?

- En matlabövning innan projektet skulle vara bra. ¹
- more scheduled time for doing the handins. ³
